

Malgorani @ Deca Trade LTD - Bulgaria

martedì 11 maggio 2010

Our company has been operating in the construction materials' market for more than 18 years and was the first company to import hydro-thermo-sanitary products like industrial armatures, bathroom articles, plumbing & heating articles (like valves, pressure reducing valves and filters) and radiators from Italy, Greece, and other European countries.

As the years passed by we became popular in the whole country with our good prices, quality, management and service which is our main company policy also. Starting with a small range of not more than 200 articles in 1992 , we are now a leading wholesaler and importer in the field with an array of more than 4000 articles for plumbing, heating, ventilation, air-conditioning and bathroom articles supplied by more than 50 manufacturers from Europe and Asia.

With our fast expanding market, and now as a member of the European Union and utilizing our vast distributor and sub-distributor network established throughout the entire country and our own vehicles with regular schedule we deliver the goods “from door” directly to the client and to any point in the country.
